ceramic

Properties of materials

We can use our **senses** to help us **describe** what a material is like.

Use your hands
to feel the object.

Use your eyes
to look closely
at the object

Object and material

This is a **chair** (object).

It is made from **plastic** (material).

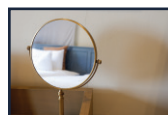

Grouping materials

We can compare and group materials in lots of different ways. These materials have been sorted into two groups.

bendy

not bendy
