

Plant or not a plant?

A plant is a living thing that grows, and often has roots, a stem and leaves.

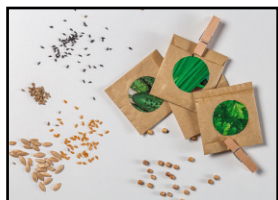

plant

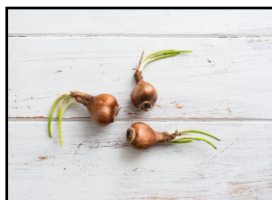

not a plant

How do plants grow?

Plants grow from seeds or bulbs.

They need water, to start growing.

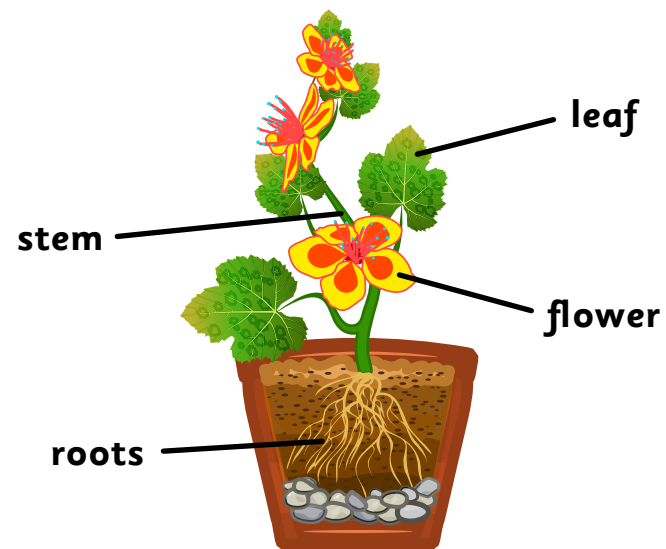

They need water, light and air to stay alive.

Parts of a plant

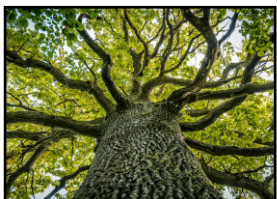

Plants come in all shapes and sizes!

Most plants have roots, a stem and leaves.
Some have flowers and fruits with seeds.

How is a tree different from other plants?

A tree is a plant with a strong, woody trunk that holds up the branches and leaves.

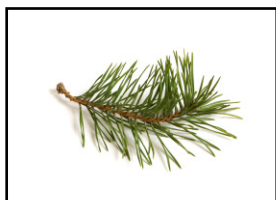

Deciduous trees

Deciduous trees lose their leaves each year.

Evergreen trees

Evergreen trees have needle-shaped leaves. They keep their leaves all year round, even in winter.

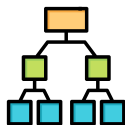

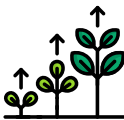

Which part of the plant do we eat?

Some plants are edible. We eat different parts of the plant: roots, stems, leaves, flowers and fruits.
